Why I decided to give this game a thumbs down: I, like many others, only play single-player. Ironically though, if I wanted to play multi-player, I could now download the f2p version. But I don't want to play multi-player, so I have to pay. And if I pay, I expect to get a product that is at least worthy of the great MOW lineage. Yet what do I get for my money? A very shoddy, unimaginative and boring sp experience. Iu2019m half way through the campaign . and Iu2019m bored. Thereu2019s no serious tactical challenge, and not a single u2018memorable momentu2019. As CtA is still early access, I'm not going to go into the game mechanics except to say that they need a LOT of work. So, what, exactly do you get for your 40 Euro (when not on sale)? Multi-player = well, you can now download that for free, so Iu2019m only going to focus on what you have to pay for. That leaves us with: Skirmish = fun for a while, but quickly gets repetitive, and definitely NOT worth 40 Euro. Campaign = absolute simplistic drivel on the level of CoD or Battlefield. E.g. the Blackhawk Down mission . really!?! Is that the best you can come up with? Now, a new, or younger player, coming from one of the above cited games may be happy with the rather childish u2018campaignu2019, and perhaps that's what the devs are after. But for an experienced tactical player it's extremely unsatisfactory to say the least. Hence, the F2P dilemma: Multi-player = free Very dull and unimaginative single-player = paid I can perfectly understand why a lot of people are unhappy about the situation, and would be compelled to express their feelings in a negative review. But here's what gave me the final push to write my own review: the patronising and arrogant diatribe posted by developer Instinct entitled Fact Check in which he dismisses anyone who writes a negative review about Call To Arms as a u2018chateru2019 and admits absolutely no responsibility for the discontent expressed by a lot of the people who bought this game. Well done Instinct, youu2019ve earned yourself another negative review, the first that I have ever given on Steam! Now, prove to me that you can do better and I might change my mind.. Great game, considering its early access, this game with be amazing when its the full thing.. Great game for an Early Access. If you liked any of the previous games in the MoW series, or RTS' in general (Wargame: Red Dragon, CoH, etc) then this is practically a must have! Seeing how us poor RTS guys are a dying breed. Also - The "Deluxe Edition" sounded pretty u2665u2665u2665u2665 first. I've never been one for season passes or anything. BUT! From what they're promising, and the very modest price increase, this seems like a great deal to me. No complaints. Free DLC, XP increase, other dummm bonuses.. I like the game but now all of a sudden i am getting this read error and the game freezes and then force closes is there a fixt to this or is the game data incomplete. Call to Arms is one of those games that i've picked up thinking this will be good for a little while. and now im hooked, got stuck in one campaign mission and left it for a while then came back and i'm like.why did i stop playing this?. Got it on sale.. Great game, considering its early access, this game with be amazing when its the full thing.
