About This Game

Good afternoon, Ladies and Gentlemen!

Today we will be exploring the mind of a young roboticist named Nash!
Let's hope we find something entertaining!

NashBored is an RPG taking place in a world of strange, twisted thoughts and demented nightmares.

Follow Nash as she is sent on a perilous journey across the valleys and hills of her own brain!

Are these just simple dreams, or is something darker at play here?

Lead Nash closer to discovering something terrible!

Features

- A classic style turn-based RPG.
- Awesome Experimental Soundtrack
- Discover the truth of what's on Nash's mind
- Multiple endings to find

-
- Traverse bizarre landscapes
 - Strange Slime Monstrosities to keep you on your toes

Title: NashBored

English

Though you swear that you are true
I still pick my friends over you

A passable story that is let down by mediocre writing and voice acting, the phrase to describe Face Noir is "has potential". Most of the puzzles are interesting and make sense, and there are a number of interesting mechanics that were deployed in a relatively effective manner. Ultimately, the poorly thought out "cliffhanger" ending makes this at best a 3/5 for me.. An excellent game well worth the asking price if you enjoy quake-like FPS arena shooters. I'm not really into the CS:GO style VR games out right now, but when I tried this out I felt it was exactly what I was looking for: fast-paced, able to leap large distances, on the fly weapon upgrades, and in-and-out 10 minute arena matches. The shooting is accurate in VR, the graphics are good, and it has a great feel to it when you're running and jumping around shooting others, The bots are good enough to play with, but what is seriously lacking is a playerbase, though I have encountered other players a couple of times. The bots fill the gap between games with others, but this game will really take off once the playerbase picks up. Bonus points for an active dev and an actually updating EA game. Highly recommended fast-paced FPS with the hopes that the more people pick this up and get into it, the better it'll be for everyone.. Wonderfully challenging, interesting graphics and love the game's random generation. Probably best not to buy it. It's a textbook example of a game design failure; the difficulty is made by having poor controls, and with long levels and no checkpoints that's more than a minor irritation.. Review after 1st season:

New way how to approach an interactive movie / video / game. A fresh new game mechanic of choosing your own way.

Using other words - two hours of exciting and time to time serious fun, worth it.. Horrible instructions and no tutorial. Why bother putting it on steam with an english language setting if the game doesn't support it!. Fun and short

+ A lot of Achievements

- No Hentai

Its very hard game. And now im stuck in 4th floor. Fast paced, quick kill quick death, free exploring.. This game just doesn't hold my interest and I'm not even sure why, as I've played other games of this type before and enjoyed them. I agree with the other reviewers who say it becomes boring and pointless very quickly. I suppose if you really like this type of game and you can get it on sale it might be worth it, as there is nothing technically wrong with it.. Let me start by saying I love Geneforge 1. That said, this is not as good as Geneforge 1. This is for the simple reason that while playing geneforge 1, everything was a mystery. Playing Geneforge 2, the player has so much more information than the character he or she is playing. This hurts a lot when you're playing a story driven game.

Pros:

Still good story writing

Multiple endings

Rewarding multiple playstyles

Leveling system (same as geneforge 1)

You get pet raptors and bigfoots

Lots of play time for your buck

Enjoyable combat system that allows for a lot of strategies.

More factions available than in 1

Cons:

not as good as geneforge 1

Opening music is bad and overall the game could use a better soundtrack

It can be difficult to tell what area you should be safe to progress to until you're dead.

TLDR; not as good as 1 but still worth a play through.

P.S. a note about the publisher I once bought the first game when realarcade was a thing (back in the early 2000s). Back then they sent a disk and an authentication Code. Well forward to around 2011ish, new computer and i lost the code. I emailed them saying I bought the game years ago and asked for another code. They sent me a new authentication code within 24 hours with no additional questions, maybe they had my email on file idk. But that's the kind of publisher i want to support. Thanks Spiderweb Software. spoczko bo za darmo kurła. Very funny! Addicted to play it, to earn all achievements. What should be not hard. Only playing... Worth the price, for some funny hours.. I have fond memories of being thrown around on these iconic trains. All the distinctive noises- the "tish" of the doors, the Gresley Bogies and the "digga, digga, digga, digga" of the compressors made these trains special.

And absolutely none of these distinctive noises are captured on this add on pack. The train as supplied is virtually silent and fails to capture the character of these trains. It looks great, but sounds terrible.

Once you get the Armstrong Powerhouse Sound Pack installed however it changes and the train is absolutely superb. But you shouldn't have to pay \u00a337.99 to buy this Add-on from Steam and then pay \u00a334.99 to Armstrong Powerhouse to make this train actually any good. Poor show Dovetail, poor show.. is good. game is dead. very sad.. Great game, has some pesky graphics power requirements for the fog and some of the more interesting lighting but otherwise the game was fun and fantastical. Loved it like I loved every Unreal game in the Unreal series.. Why I bought a DLC but my can't get Item in game. I have bought and lost money. Please help me. I'm not good at English. Please
